

National Information Governance Review Programme for Health and Social Care

Alastair Rennie (RDS, CIO)

On behalf of

Elena Beratarbide (HSC, Head of Information Assurance and Risk)

National IG Review key recommendations

Information Governance

Review: Executive Summary

Review of the Information Governance Landscape across Health and Social Care in Scotland

<https://www.gov.scot/isbn/9781802012538>

Vision		
Streamlined Information Governance (IG) in Scotland, to enable the realisation of benefits from digital and data-driven health and care innovation.		
A holistic IG approach to enable end-to-end information across public sector		
Main recommendations		
Lead & Steer	Innovate Co-Produce Scale-Up	Demonstrate success and Assurance
1 Set the National IG Direction for Health & Care	5 IG People	9 IG Maturity baseline
2 Engage effectively to co-produce solutions.	6 IG Processes and structures	10 Plan for IG improvement
3 Readiness. Prepare.	7 IG Tools	11 Monitor IG progress and assurance.
4 Inspire. Motivate.	8 IG Products (data and digital assets)	12 Scale IG up.

Figure 7. Summary of the IG Review's key recommendations

Vision

Streamlined IG in Scotland,
more coherent and less fragmented,

to enable the data-driven innovation in the health & care sector.

A holistic IG approach enabling end-to-end data and digital technologies across H&C.

National IG Programme for Health & Care Goals & Vision

- Goals
- A more balanced federated IG model
 - Mature IG across the H&C ecosystem
 - Empowered People for their role in data and digital
 - The right tools for the IG task
 - Enhanced transparency
 - Transformative participatory Public Engagement

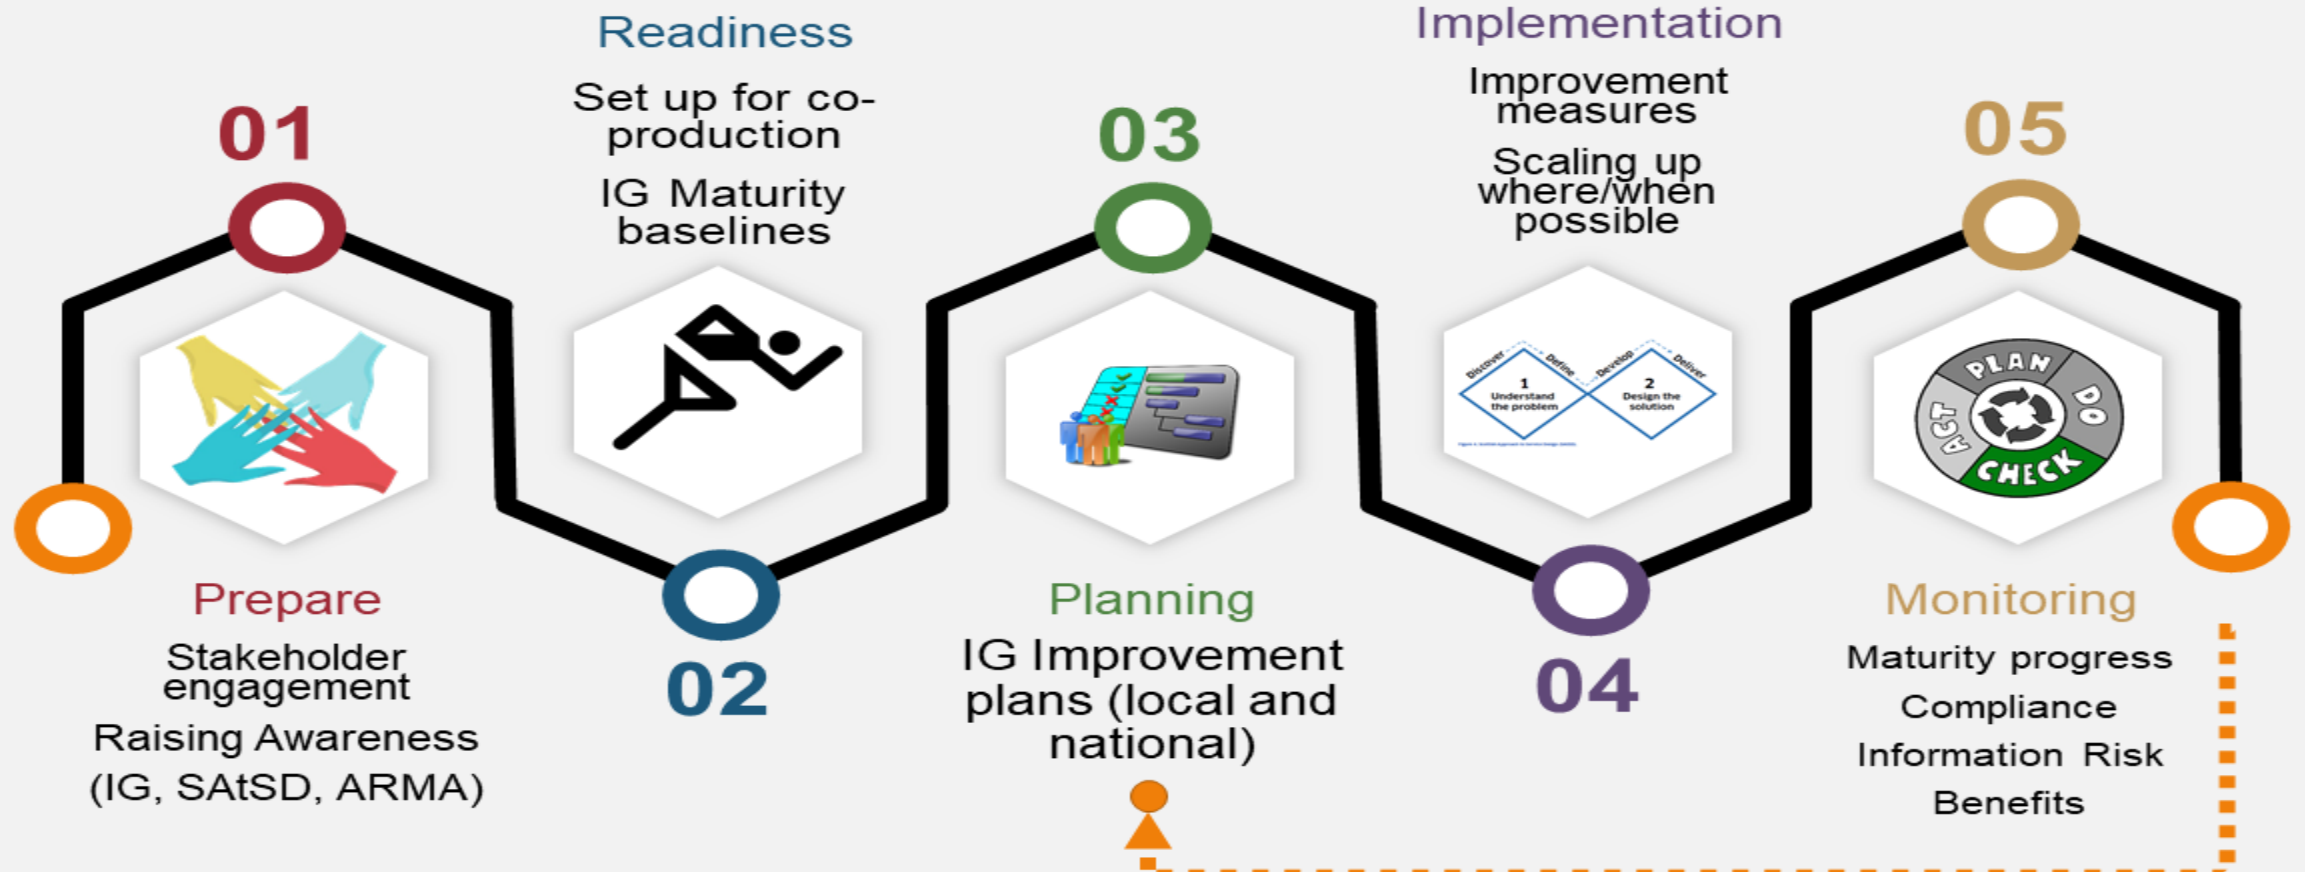

It is all about decision-making and management of data and information technologies.

- **IG enables the fair, transparent and secure use of data and digital systems** which are essential to the delivery of services and transformation across the DH&C sector.
- **Culture and behaviour** are barriers to change that we can overcome
- **Many partners** (including new ones e.g. NCS) are part of this **holistic IG approach**
- We must **empower people** to manage information, privacy and security risks or opportunities by providing **the right tools and training for the job**
- We must find **a more coherent and less fragmented IG landscape**

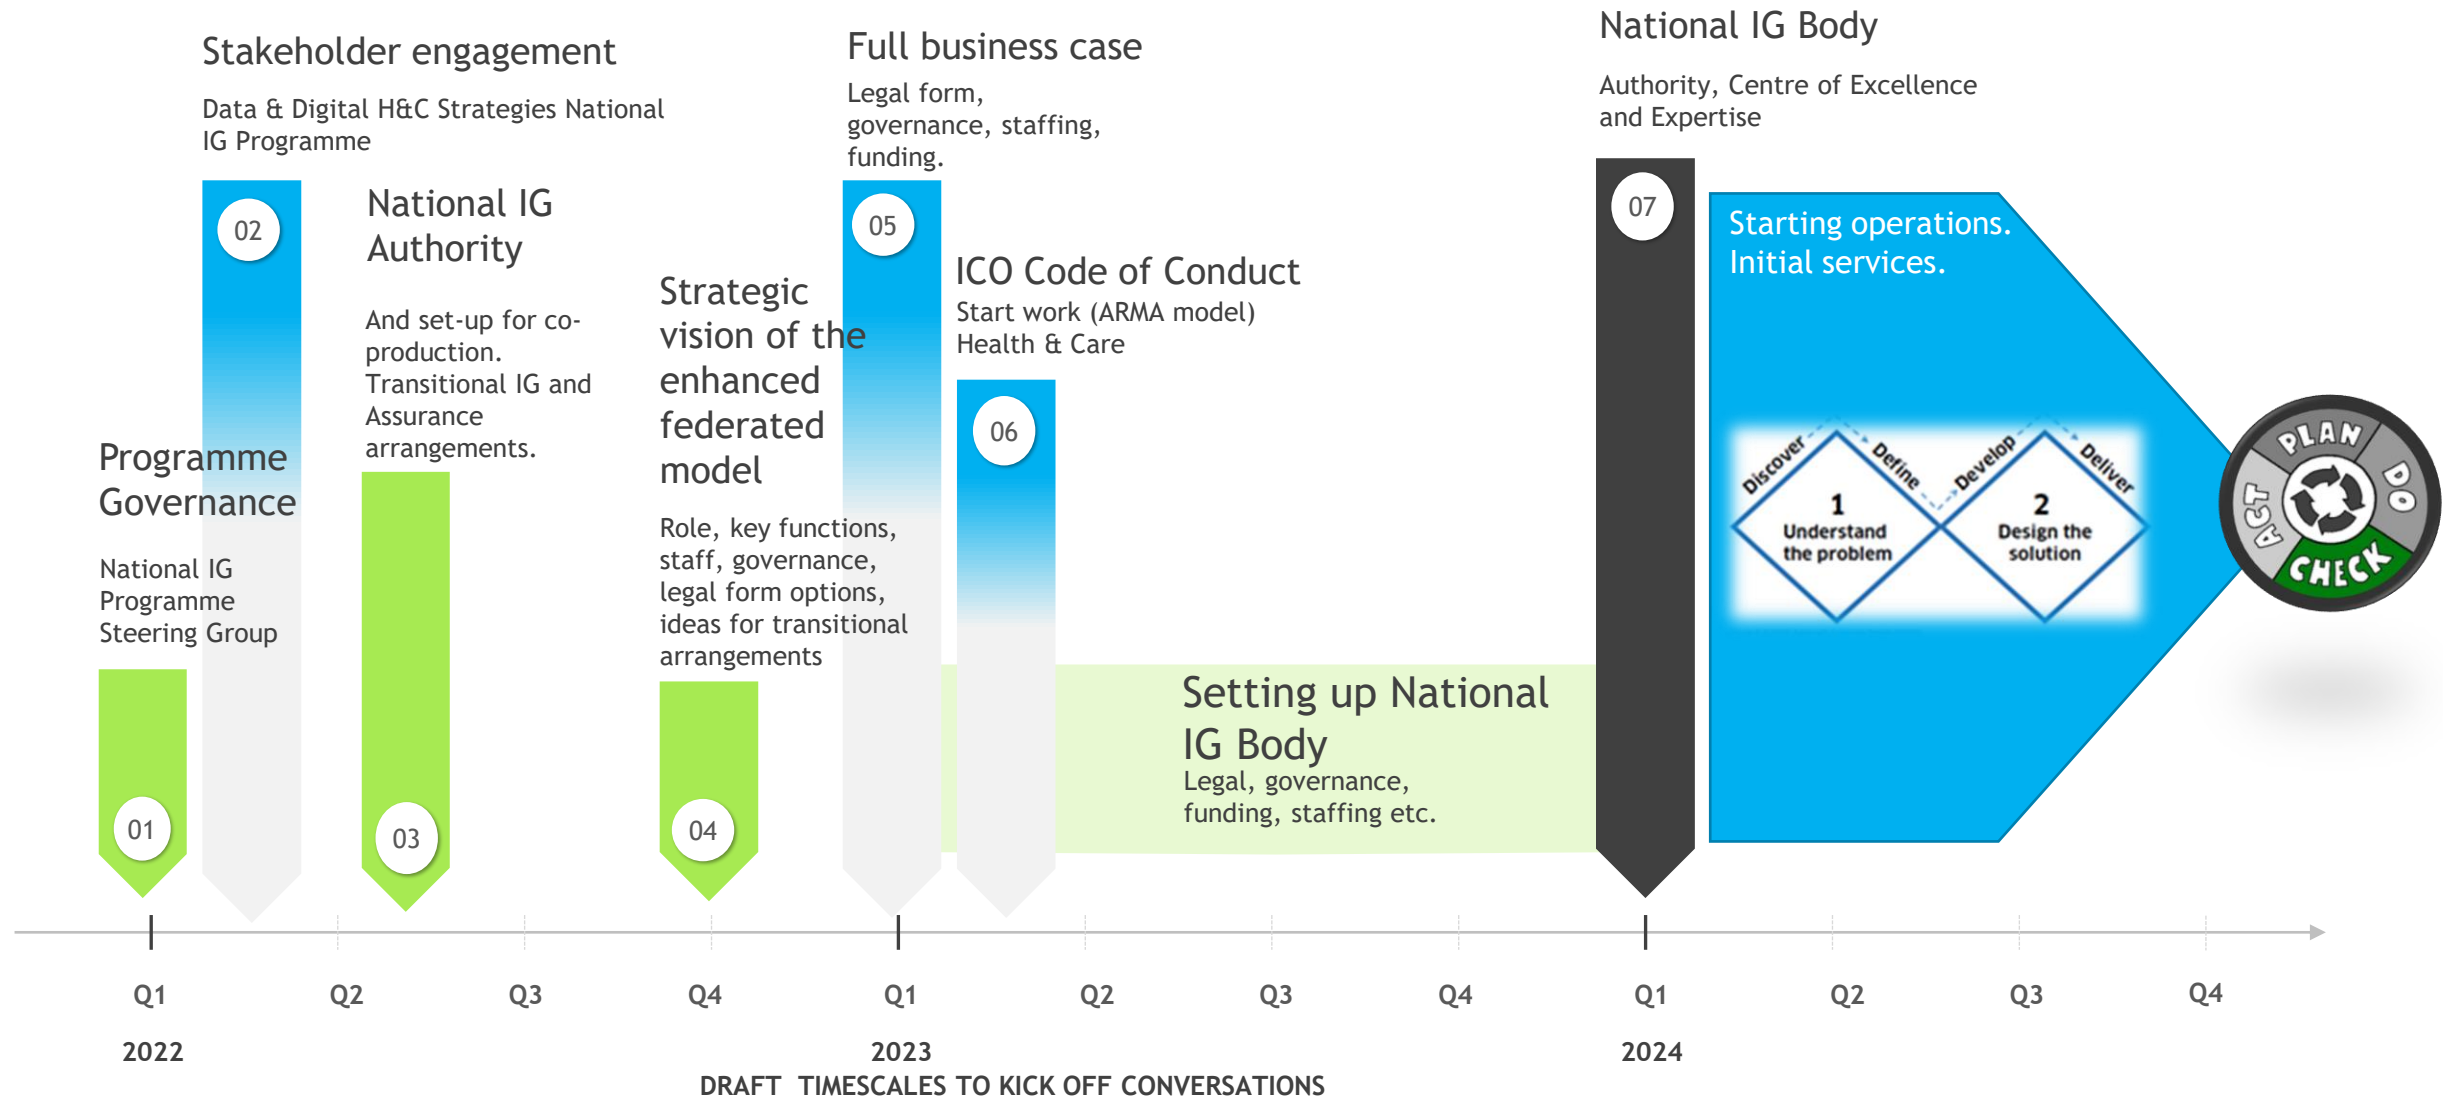

Next Steps: National IG Programme for Health and Care

DISCLAIMER

- The following slides are only to illustrate the ideas we are exploring to deliver some key pieces of work, however this is very much still under consideration (starting to), therefore this is not a firm proposal, particular with regards to timescales.
- We will be approaching various groups of interests across the stakeholders to tease out the delivery of this key work streams.
- We envisage the National IG Programme to be a permanent instrument to deliver IG across relevant data and digital strategies (as they evolve), not just the 2 years depicted in these slides.
- Any feedback, thoughts or ideas on these areas is welcome (e.g. Are we being too ambitious or too slow for what's required? Priority areas? Ideas for co-production?)
- We aim to use our experience with COVID-19 as well as key projects (e.g. Digital Front Door) to deliver and progress on each of these key areas.

Goal: A more balanced, federated National IG model

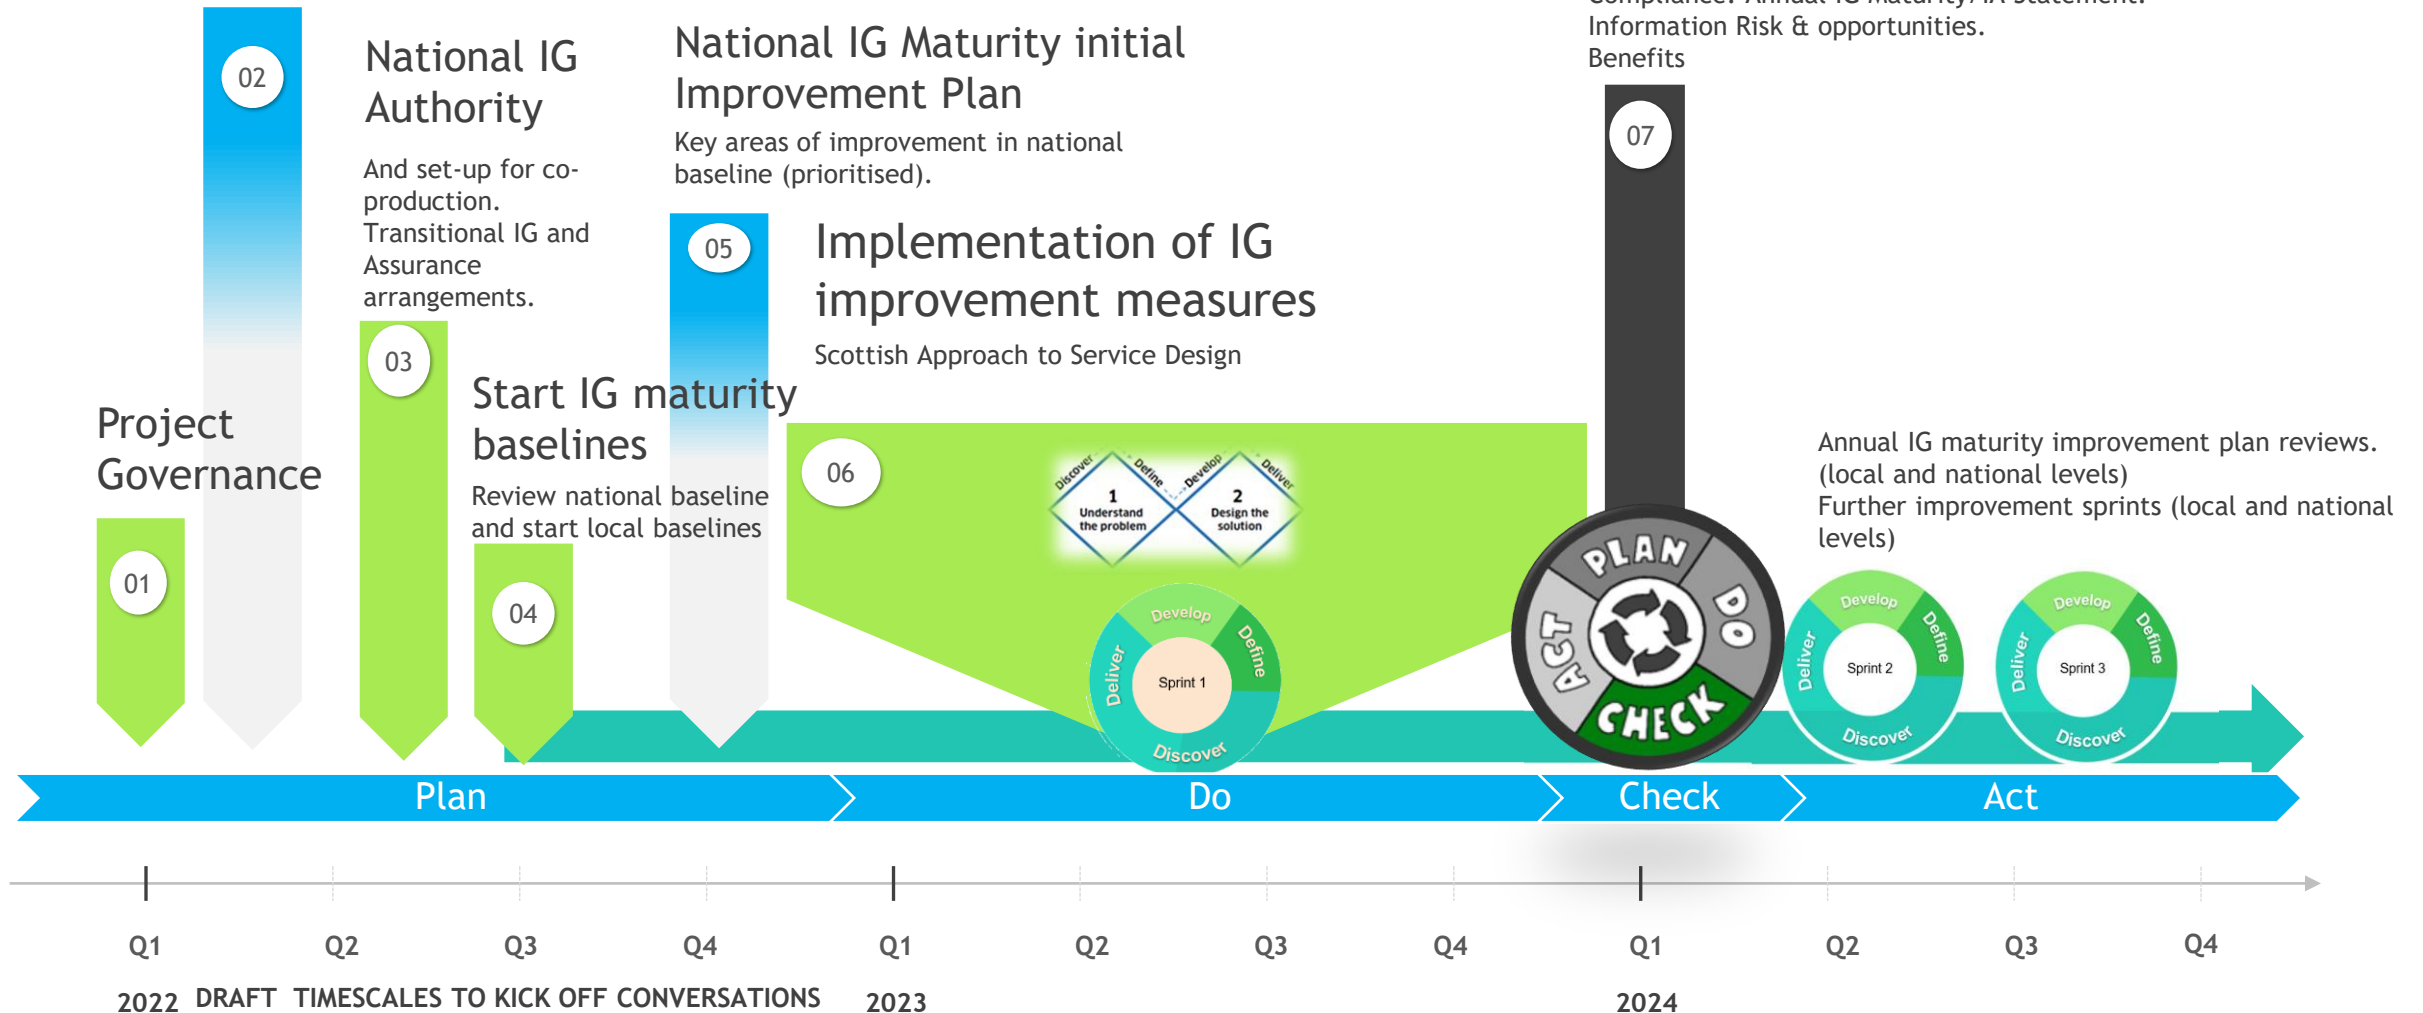

Goal: A more mature IG across the health and care ecosystem

Stakeholder engagement

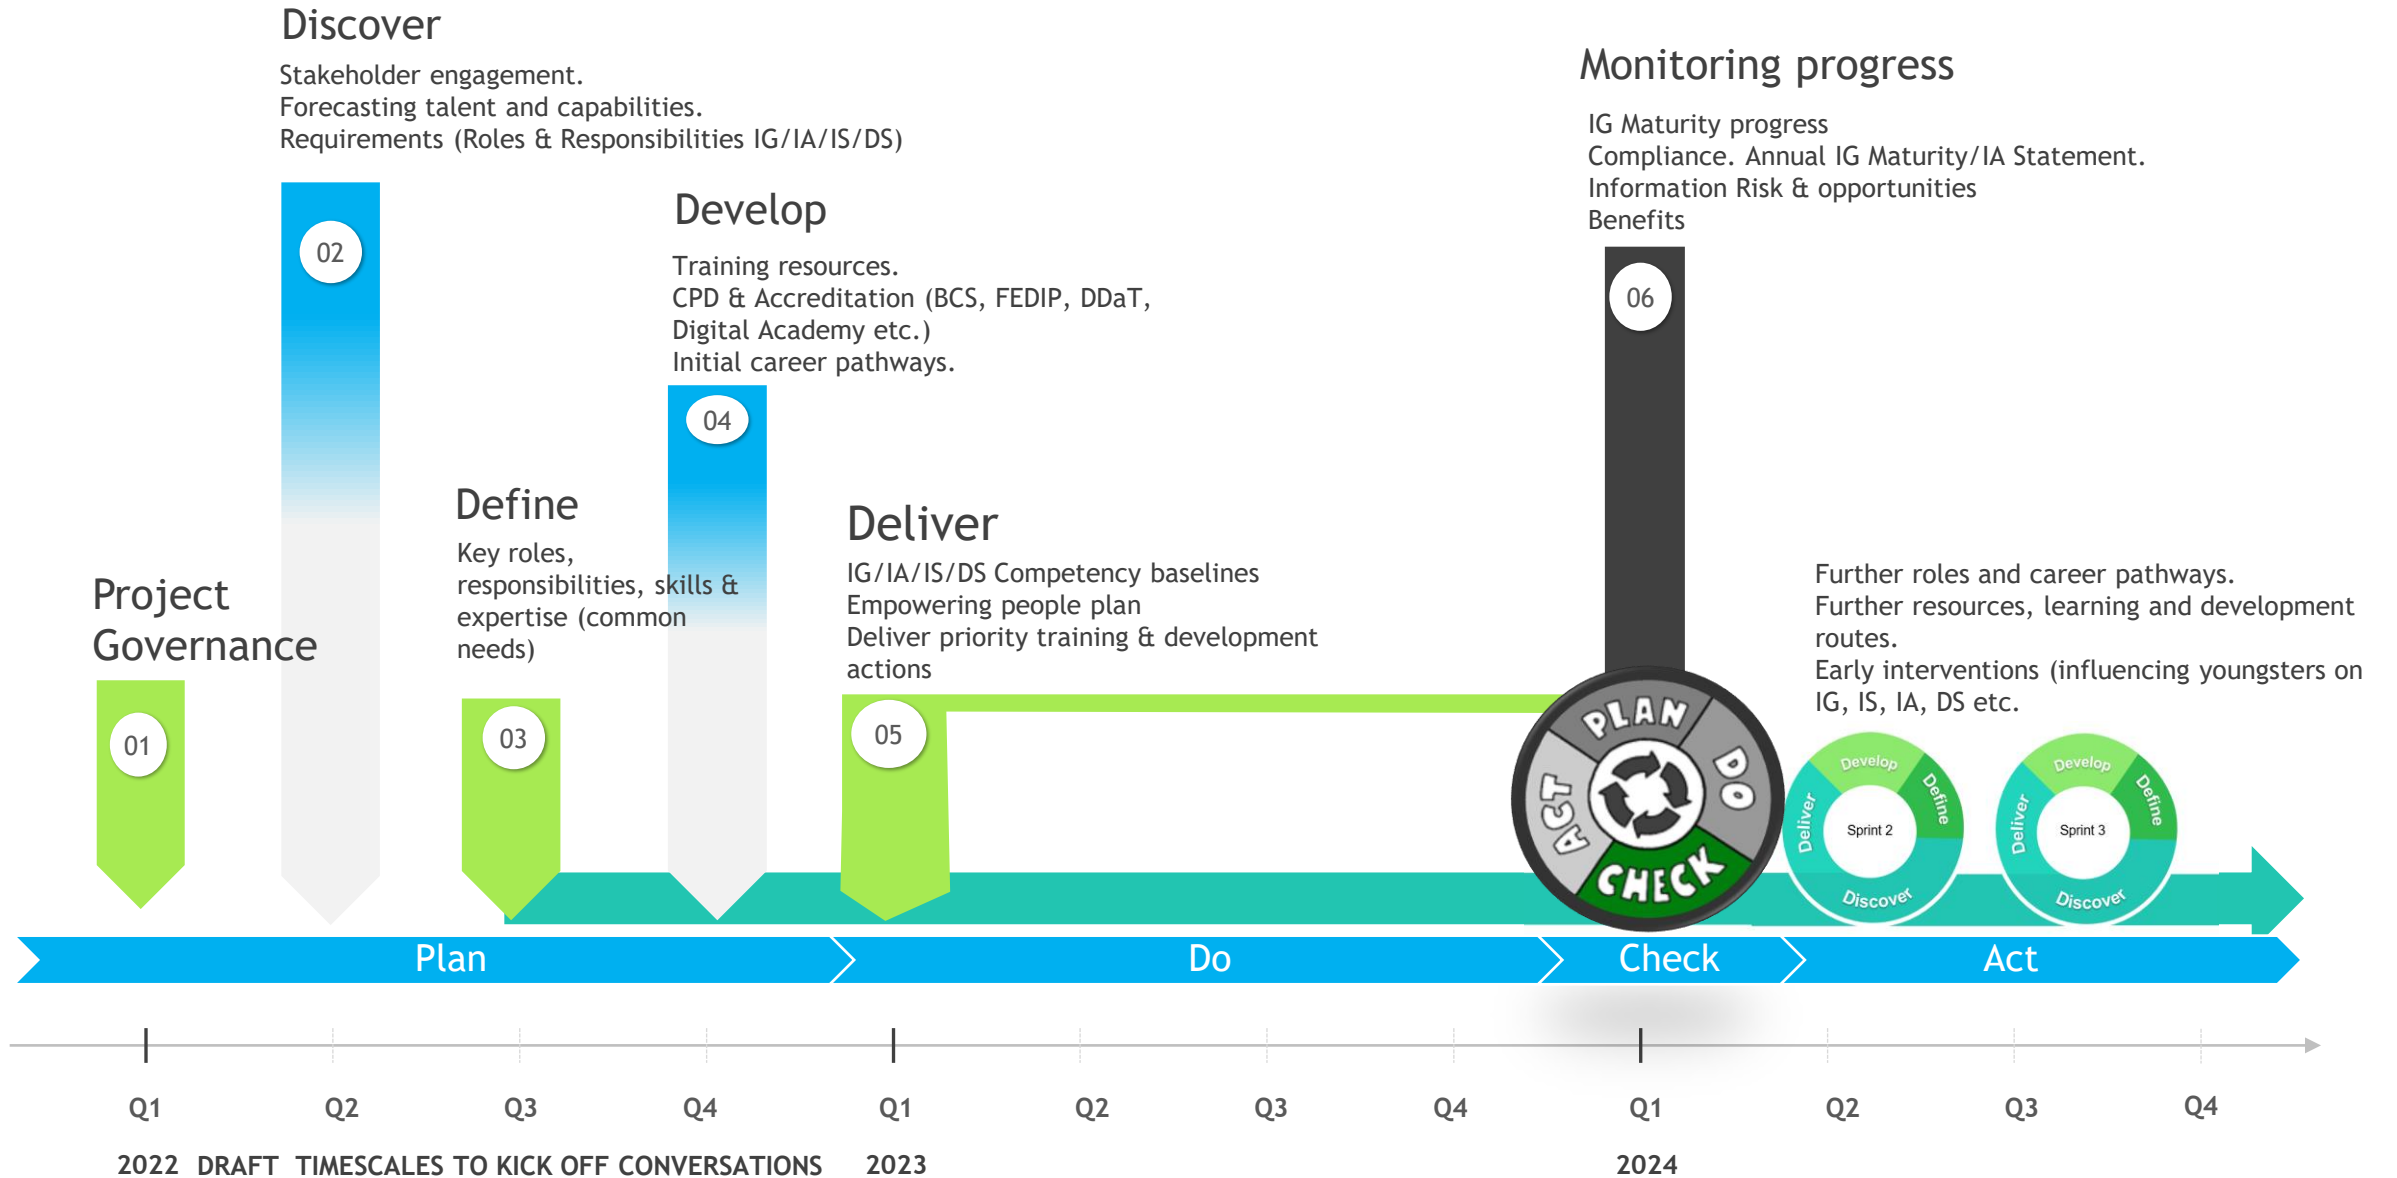

Awareness: ARMA IG Implementation Model, SAtSD
In parallel to National IG Programme initial engagement

Monitoring progress

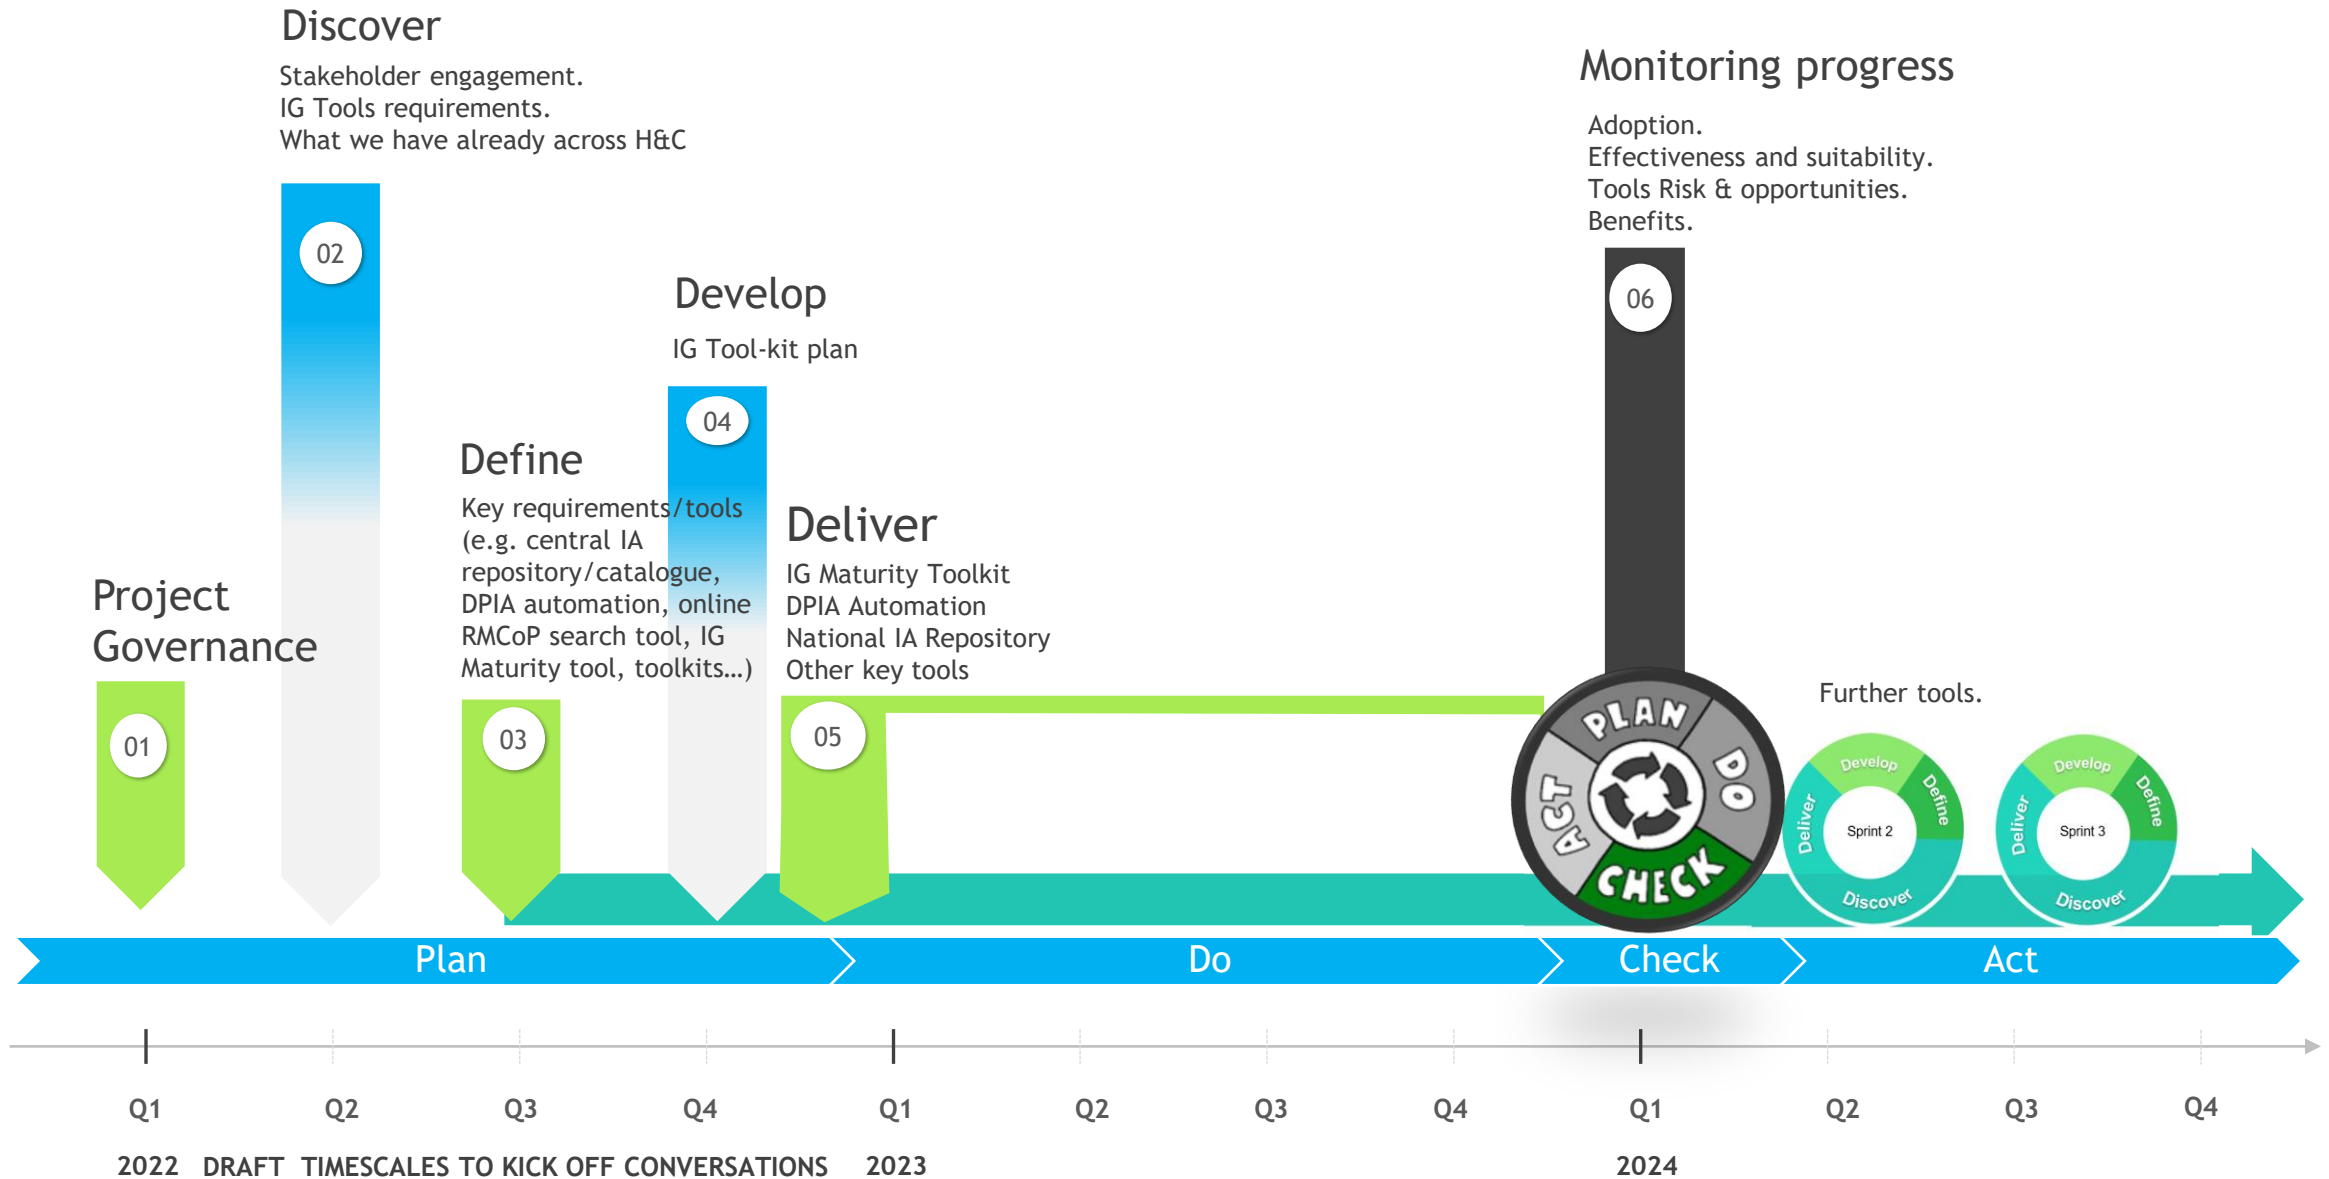

IG Maturity progress
Compliance. Annual IG Maturity/IA Statement.
Information Risk & opportunities.
Benefits

Goal: Empowered People for their role in data and digital

Goal: Enable IG - The right tools for each IG task

Goal: Enhanced transparency and trust through transformative-participatory Public Engagement
